Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102/35 USC § 103

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section.102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 7-11, 13, 14, 16, 18, 20-27 and 31 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over U.S. Patent No. 5,554,120 to Chen et al. (hereinafter "Chen").

Chen discloses balloon materials for use with catheters, which include a shaft. Chen uses balloon materials of at least two components, both of which can be PEBAX, a polyether block amide polymer (see col. 5, lines 30-32, and col. 6, lines 20-22). Component B has a Shore durometer hardness of less than 75 D to "soften" the composition and comprises 5% to 90% of the total blend composition. Component A is "harder" than Component B, i.e. Component A having a higher Shore durometer hardness than Component B, and comprises 10% to 95% of the total blend composition. See col. 4-6. Chen et al. disclose all the limitations of the claims except for compliance, flexural modulus, mean rupture pressure, and dual wall thickness. Since the

Art Unit: 3763

disclosed polymer blend composition is clearly within the range of the claimed composition, the claimed properties are necessarily present in the composition disclosed by Chen. See MPEP § 2112.01.
